Meeting 16/10/2019

Stephen Coleman

16/10/2019

Summary

This meeting was more "touch-base" than anything else. The following were discussed:

- Working from elsewhere: use the group calendar.
- Make a noting system that Chris can find for meetings.
    - Consider a repo where weekly summaries can also live?
- Re-stated plan to create summary docs of different integrative clustering methods.
- Biology lectures.
